

Yakub Susabda
Annual Report - 2018

I hope that this letter finds you well in God's blessing as always. Esther and I are doing well here in our ministry in Indonesia and abroad.

Although technically we are retiring and trying to scale back, we are currently still in the same roles as before. We teach 6 to 7 classes each semester and on the weekends we serve in various ministries (teaching seminars and preaching). We will go to Singapore next month for a family seminar and preach on Sunday service. I have started a Christian Counselor Association to help many other seminaries that offer master degree in counseling without Government accreditation. We are trying to build a dialog with all other Christian Counselors from many different denominations and backgrounds with a purpose of helping and equipping them with more responsible knowledge on Christian counseling and integration between Psychology and Theology. In October we will have a meeting in Thailand with all of the Christian Counselors from almost every country in Asia. We will host the Asian Counseling Conference in Bali Indonesia next year.

Our seminary (Reformed Theological Seminary in Indonesia) is also in God's blessings. We now have 150 students and five different degree programs. We just invited two new full timers with doctorate degree to start a new master program in " Worship and Church Ministry." We do hope that we may train many pastors to renew their ineffective worship service in the churches in Indonesia. We hope that we may offer a solid reformed evangelical worship service with a new spirit that will substitute the influential charismatic worship all around the world.
